St. Petersburg, March 24.—Although slow to believe that Japan deliberately contemplates a violation of her pledge to respect neutral Chinese territory, the ministry of war has received reports so specific that they compel consideration.

The presence of disguised Japanese soldiers acting as spies along the Shanhaikwan road has been established, and Russian agents report that there is every indication of an intended landing on the west coast of the Gulf of Liao Ting.

If the information received is correct, the Japanese have discovered that a West coast of the Gulf of Llao Ting.

If the information received is correct, the Japanese have discovered that a landing on the peninsula is too hard a nut to crack, and have elected to land on the Chinese side, where there will be no army to repel them. The only two points feasible for landing are Chinwatao and Tienkiaucheng, which are connected by rail respectively with Shanhaikwan and Kauklau on the Peking railroad. A landing at either place would give the Japanese possession of a splendid strategic line, by which to strike the Russian flank, and, if desired, to hold Peking in subjection.
